

# “RAILWAY EXPRESS AGENCY”

Steel Welded Express Refrigerator Cars

“Unique Cars for your Passenger Trains”

*In S Scale Brass*

*Expertly built by the Master Craftsman at Boo Rim Precision*

These cars appeared in passenger trains throughout the country. River Raisin Models has commissioned a small run of these unique Express Reefers built by American Car and Foundry in 1947-1948 for the Railway Express Agency and Atlantic Coast Line Railway. The REA Reefers were numbered 6100 – 6599, the ACL Reefers were numbered 3000-3049. River Raisin will be offering these cars in four paint schemes. Each scheme will be made with multiple car numbers for those who order more than one of a paint scheme. We will offer both original paint schemes (The Railway Express Agency Dark Green and Aluminum, with Red Stripes Scheme, and the Purple and Aluminum with Yellow Stripes Atlantic Coast Line Railroad Scheme.) We will also offer two of the later paint schemes of the Railway Express Agency Reefers that saw use until the end of the REA. See our website for updates to this project including photos and information. [www.riverraisinmodels.com](http://www.riverraisinmodels.com).

RRM #REA-001

ACF Industries, Hawkins/Wider/Long Collection.””

RRM #REA 002 One of the 50 cars purchased by the ACL. Collection of Bob's Photos.

RRM #REA-003

Collection of Bob's Photos

The REA began repainting the cars in the early 1950's to a simpler scheme of dark green with Dulux gold lettering. In the Mid - 1950's, the REA diamond monogram was added. We are offering the scheme with the REA monogram.

RRM #REA-004

Collection of Bob's Photos

In 1962, the cars were repainted in various lettering schemes in the "apple green" paint scheme. We are doing the white speed lettering with the modernized REA logo.
