

“Southern Pacific Moguls” “M-6 2-6-0’s” In S Scale Brass

Expertly built by the master craftsman at Boo Rim Precision

River Raisin Models has negotiated a small run of SP Moguls that will be imported along with the SP 0-6-0's. These models will be produced in four road numbers that will feature several different tenders and will include the features and quality that you have grown to expect from River Raisin Models. **We have included the ability to order any locomotive with a USRA coal tender. A great freight or shortline passenger peddler for any railroad.** See our website for updates to this project including photos and information. www.riverraisinmodels.com.
